</div>

<div>SITUATION: <div> </div> An upper level disturbance will push through the state starting tonight and through the weekend. <div> </div> With this disturbance there is a chance of rain for portions of the state, and combined with the freezing temperatures there will be a possibility of freezing rain or sleet. <div> </div> The four NWS offices that serve our area have all briefed that the accumulation of any type of ice or freezing rain will be very minimal if any at all. <div> </div> Listen to your local NWS offices for the latest weather reports for your area.</div>
