

GOHSEP Situational Awareness Report

5 June 2016

As of 2:30 pm

**State EOC Activation Level: CAT (Crisis Action Team) **

Situation: The National Hurricane Center is currently monitoring a tropical depression in the Gulf of Mexico region. The National Weather Service is also monitoring a deep upper low impacting the Southern Plains and Lower Mississippi River Valley throughout this weekend. Showers and thunderstorms are expected to impact the region through tonight and possibly into Monday. Stay tuned to your local National Weather Service for the latest information.

** **

Tropical Weather Outlook: The National Hurricane Center is issuing advisory on newly formed Tropical Depression Three, located over the south-central Gulf of Mexico. Tropical cyclone formation is not expected during the next 5 days. The center of Tropical Depression Three was located bear latitude 22.7 north, longitude 88.1 west. The depression is moving toward the north near 9 MPH. A north northeastward motion at a faster forward speed is expected later today through Monday. On this track, the center of the depression is forecast to approach the coast of the Florida Big Bend area
