Dorian upgraded to a Category 1 Hurricane near St Thomas in the U.S. Virgin Islands as of 5:00 p.m. today. The hurricane is located just east of Puerto Rico, moving northwest at 14 mph with maximum sustained winds of 80 mph. Dorian is expected to continue moving northwestward for the next day or two and is expected to strengthen to a Major Hurricane by Saturday near the Bahamas. Hurricane Dorian is forecast to make landfall someplace along the east coast of the central north coast of Florida.
