The Governor's Office of Homeland Security and Emergency Preparedness has virtually activated the LA BEOC for the storm in the Gulf of Mexico, Tropical Storm Lee. The activity of the LA BEOC during this event will primarily involve providing information to all stakeholders and the general public via the LA BEOC web portal. News Alerts will be posted throughout the day, as appropriate, and registered users will receive notifications of these News Alerts according to their preferences.

The mission of the LA BEOC in support of any major disaster is to focus on providing situational awareness and resource support, supporting community recovery, mitigation, and economic stabilization.

What you can do

During a virtual activation, registered companies may participate by reviewing news alerts that will be posted throughout the event, providing status updates if their business is affected by the event, and responding to resource requests as they arise. However, no governmental agency can guarantee the utilization of any business during an activation of the LA BEOC.

Thank you for your cooperation,
