

GOHSEP Special Events Report

<p class="MsoNormal" style="line-height: 115%; margin-bottom: 10pt">As of
1930

hours 16 September 2012 NWS/NHC is tracking 3 systems in the

Atlantic-Caribbean-Gulf of Mexico basin. These systems are:<o:p /></p>

<p class="MsoNormal" style="line-height: 115%; margin-bottom:
10pt">Hurricane

NADINE<o:p /></p>

<p class="MsoNormal" style="line-height: 115%; margin-bottom: 10pt">Invest 92<br
</p>
(Item 2 on the link below)<o:p /></p>

<p class="MsoNormal" style="line-height: 115%; margin-bottom: 10pt">Invest 93<br
</p>
(Item 1 on the link below)<o:p /></p>

<p class="MsoNormal" style="line-height: 115%; margin-bottom: 10pt">The link
below

shows the latest position of these three systems<o:p /></p>

<p class="MsoNormal" style="line-height: 115%; margin-bottom: 10pt">http://www.nhc.noaa.gov/gtwo_atl.shtm
</p>

<p class="MsoNormal" style="line-height: 115%; margin-bottom: 10pt">While
NADINE

is projected to remain in the Atlantic and not impact Louisiana, the other two

systems bear monitoring.<o:p /></p>
