GOHSEP SPECIAL WEATHER REPORT
8 January 2015

STATE EOC ACTIVATION LEVEL:
Crisis Action Team (CAT)

WebEOC Incident Name: 15-004 Winter Weather - Statewide, 7-10 January 2015

SITUATION:
An upper level disturbance will push through the state starting tonight and through the weekend. With this disturbance there is a chance of rain for portions of the state, and combined with the freezing temperatures there will be a possibility of freezing rain or sleet. The four NWS offices that serve our area have all briefed that the accumulation of any type of ice or freezing rain will be very minimal if any at all. Listen to your local NWS offices for the latest weather reports for your area.

FORECAST for LOUISIANA:

Southwest Louisiana: Increasing cloudiness with an approaching upper level disturbance will commence tonight into Friday, with a chance of precipitation early Friday morning. With low temperatures near or just below freezing expected along and north of I-10 Friday morning, a chance for rain mixed with sleet and freezing rain is possible between midnight and daybreak Friday morning. A chance for rain mixed with sleet and freezing rain will continue through late Friday morning, tapering off by late afternoon and evening. Yet another upper level disturbance is forecast to move across the area Saturday morning.
