GOHSEP SPECIAL WEATHER REPORT

GOHSEP SPECIAL WEATHER REPORT

4 March 2015

As of: 5:30 pm

STATE EOC ACTIVATION LEVEL: CAT

SITUATION:

An arctic cold front will move through the area Wednesday night with the possibility of a wintery mix across most of Louisiana. This system should move out of the area by Thursday afternoon bringing slightly warmer temperatures back into the state for the weekend.

FORECAST for LOUISIANA:

Southeast Louisiana:

A strong arctic front will bring cold air back to the area for the end of the work week. There is a very low risk of light freezing rain developing Thursday morning across portions of southeast Louisiana to the north of Baton Rouge. If freezing rain develops, little if any ice accumulation is expected and impacts should be minimal.

Southwest / Central Louisiana:

A few showers and even an isolated thunderstorm is possible.
